

Jeet Deula

jetdeula@gmail.com | jeetdeula.com.np | github.com/Jett78

Dedicated web developer from Kathmandu, Nepal expertise in React.js, Next.js and Nodejs. Proven in building responsive, secure web applications using modern frameworks, robust APIs and data-driven techniques to deliver user experiences.

Experience

Frontend Developer, Nepal Tech Innovations – Lalitpur

May 2025 – Present

- Guided junior developers by providing technical mentorship and effective solutions.
- Implemented technical SEO strategies to improve website performance and visibility.
- Maintained and optimized legacy projects to enhance efficiency and code quality.
- Collaborated in an Agile team environment, participating in sprint planning and daily stand-ups.

Frontend Developer, Webx Nepal – Kathmandu

July 2024 – May 2025

- Delivered 10+ projects of all sizes, creating solutions for consumer service.
- Developed responsive web applications using Next.js, incorporating advanced animations with libraries like Framer Motion, Gsap.
- Collaborated in an Agile team environment, participating in sprint planning and daily stand-ups.
- Integrated APIs to enhance application functionality and facilitate seamless data exchange between frontend and backend systems.
- Implemented server-side rendering using Next.js, enhancing SEO capabilities and reducing client-side rendering.

Frontend Developer, Clouds Nepal – Kathmandu

January 2023 – July 2024

- Implemented reusable React components to improve code efficiency and maintainability.
- Worked with styled-components, tailwind and SCSS for component styling.
- Used Git for version control and collaborated with team member through github
- Fix bugs and optimize code in existing applications.

Projects

La Cosmetics Nepal

[Project Link](#)

A consumer-focused E-commerce application showcasing a scalable B2C architecture.

Tech Stack: TypeScript, Next.js (App Router), Express, PostgreSQL, Prisma ORM, REST APIs

Authentication & Design: Next auth for secure user flows; sleek UI with Tailwind CSS and Shadcn UI

Core Functionality:

- Designed and optimized product listing, search, and checkout workflows to improve user experience.
- Admin dashboard features for inventory management, product updates, and order processing.
- Improved application performance using SSR/SSG techniques in Next.js, reducing load times and enhancing SEO
- Collaborated in an Agile development environment, participating in sprint planning, code reviews, and iterative releases.

Nepali Share News

[Project Link](#)

Stock market News Portal and analytics platform focused on NEPSE data and financial updates.

Tech Stack: TypeScript, Next.js (App Router), Express js, PostgreSQL, Prisma ORM, REST API, Khalti API, Zoom API

Authentication & Design: Next auth for secure user flows; sleek UI with Tailwind CSS and Shadcn UI

Core Functionality:

- Developed a stock market news and learning platform serving 1,000+ monthly active users, focused on NEPSE insights and financial education.
- Developed subscription/package purchase system with secure payment integration using Khalti.
- Built protected routes and user flows for authenticated access to premium content and live sessions.
- Admin dashboard features for managing news, users, classes, and payment records.
- Implemented SEO best practices, increasing organic traffic by ~25% within initial deployment phase.

OkilSaab

[Project Link](#)

Legal tech SaaS platform and document drafting suite designed to simplify legal documentation and workspace management for individuals, lawyers, and corporate teams in Nepal.

Tech Stack: TypeScript, Next.js (App Router), Node.js, Nest.js, PostgreSQL, Prisma ORM, Google Transliterate API, REST API.

Authentication & Design: Multi-role token authentication via client cookies, responsive and modern UI using Tailwind CSS, Radix UI, and Shadcn UI

Core Functionality:

- Developed a legal tech workspace and resources platform with dedicated public, client, and admin portals to streamline document workflows and legal templates.
- Built a legal document generator utilizing Google Transliterate API to enable seamless, on-the-fly English-to-Nepali transliteration within custom drafting forms.
- Implemented a secure, role-based session system managing individual JWT tokens.
- Engineered cloud storage integrations using the AWS S3 SDK for high-performance single/multiple file uploads of client attachments, corporate profiles, and legal documents.
- Architected an administrator control panel for configuring document templates, user settings, subscription tiers, and on-demand cache revalidation (revalidateTag) to optimize API query performance.

Skills

Technical Skills :HTML & CSS, JavaScript/TypeScript, Tailwind, React, Next.js, Node.js, Nest.js PostgreSQL, MongoDB, Docker, Agile & Scrum, Git & GitHub.

Education

KCMIT College Kathmandu– Bachelor in Information Management.

2024
